Types of DP Planning

- Preservation Planning (ongoing)
- Self-assessment (internal process)
- Audit (external review by peers)
- Development plans (result of audit)
- Certification (future option?)
Digital Preservation Policy and Strategy

2008

Preface
This digital preservation strategy sets out what the National Library of Wales (NLW) intends to do to preserve digital materials over the next three years. It builds upon the foundations established by the first two digital preservation strategies. This new strategy aligns with the Library’s overall strategy The Agile Library: The Library’s strategy 2011-14, which places an emphasis upon unlocking the potential of the Library through the application of efficient business processes and focuses on institutional flexibility, content use and external relationships.
## NIST Planning Components

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Continuity Plan (BCP)</td>
<td></td>
</tr>
<tr>
<td>Business Recovery Plan (BRP)</td>

Self-Assessment and Audit

- Test audits 2006, 2011
- Ten Principles, 2007 (Platter – plans to address)
- Nestor (Germany) – criteria
- DINI (Germany) – certifications
- DRAMBORA (DCC, DPE) – tool
- Data Seal of Approval – 16 elements
Role of Audit

Benefits of audit (self-assessment):
• Requirements provide checklist
• Includes gap analysis
• Produces development plan
• Provides evidence for stakeholders
• Enables transparency for DP program
Results of TRAC Review

• Formalize policies
• Define roles and responsibilities
• Consider succession planning
• Designate funding
• Rationalize metadata
• Address preservation rights
• Prioritize technical developments
Ten Principles

1. Commits to continuing maintenance of digital objects for identified community/communities.

2. Demonstrates organizational fitness (including financial, staffing structure, and processes) to fulfil its commitment.

3. Acquires and maintains requisite contractual and legal rights and fulfils responsibilities.

4. Has an effective and efficient policy framework.

5. Acquires and ingests digital objects based upon stated criteria that correspond to its commitments and capabilities.

6. Maintains/ensures the integrity, authenticity and usability of digital objects it holds over time.

7. Creates and maintains requisite metadata about actions taken on digital objects during preservation as well as the relevant production, access support, and usage process contexts before preservation.

8. Fulfils requisite dissemination requirements.

9. Has a strategic program for preservation planning and action.

10. Has technical infrastructure adequate to continuing maintenance and security of its digital objects.

</table>
In Practice...

- Self-Assessment
  - Internal
  - External
  - Community-driven

- Audit
- Certification
